

Benefits – Pressure reducing valve DM 618Z ASME

Compact, sturdy design	1
High stability, fit and forget	
Favourable fluid dynamics	2
Higher K_{VS} values	
Bonnet and medium-wetted internal parts of stainless steel (1.4404 / 316L)	3
Corrosion-resistant	
Mankenberg clamp system and plug-in pack	4
Easy maintenance	
Closed bonnet	5
Complete protection against contact	
Leakage line connection and adjusting screw seal	6
Suitable for flammable and hazardous media	
EASY-CHECK – non-rising adjusting screw	7
Function externally visible, easy and accurate to adjust the set pressure, non-varying installation height	

Balanced cone	8
Outlet pressure control independently from the inlet pressure	
Water trap	9
No compensation chamber needed	
Exchangeable drives	10
Easy change between pressure ranges	
Matched control surfaces, springs and control lines	11
Very high control accuracy	
Options	
PTFE protection film	a
Inlet pressure	
Outlet pressure	
Control pressure	
Water trap	

Vorteile – Druckminderer DM 618Z ASME
