

Benefits— Pilot-operated Backpressure Regulator RP 820

Precise control through pilot valve
Very high control accuracy without auxiliary energy **1**

Opening and closing velocities can be set via throttles
Optimal control behaviour **2**

Replaceable pilot control
Flexible application **3**

Compact design
Minimum space required **4**

Up to PN 160
Usable for high pressures **5**

Options

- With hard facing/ hard-faced cone **a**
- Usable for high differential pressures **a**
- Body made of stainless steel (316L) **b**
