

Benefits – Start-up Bleeding and Venting Valve EB 3.50

Large seat surface, soft seal
High bleeding and venting performance, tight valve closure **1**

Sturdy valve mechanism
Low maintenance **2**

Internal parts and float resistant to pressure and corrosion, made of CrNiMo steel (316L)
Long operational lifespan **3**

Various connection possibilities: aseptic flanges, DIN or ANSI flanges, welding ends ...
No adapters or fitting pieces required **4**

Compact design
Minimum space required, easy transport **5**

Deep-drawn version possible
Good price-performance ratio **6**

Options

Optional Elastomeres
Oil- and gasoline-resistant **a**

Body made of stainless steel (316L) **b**

Special coating
Flexible application in different environmental conditions **c**

Float adapted to medium density
Application in petrochemistry possible **d**
